Students must choose two electives that together engage across all three pillars of sustainability – Environment (E), Society (S), and Economics (Ec). Each elective must engage with at least two of the three pillars. At least one elective must originate outside the ENVIRON department.

*The elective list is periodically reviewed and updated. Please note that courses change frequently in title and content. However, this list is not exhaustive and in order to ensure that a course not on the list below meets the certificate requirement, students must clear their selection with the Sustainability Engagement Certificate staff.*

- AAAS 345S: Activism, Women, and Danger (S, Ec)
- BIO 209D: Ecology for a Crowded Planet (E, S)
